The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/519,530	Applicant(s) KOLIOS ET AL.	
	Examiner Samuel A. Barts	Art Unit 1621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's arguments filed 07/23/2008 have been fully considered but they are not persuasive. Applicant has amended the claims by stating that the ammonium salt is separated as a precipitate. The examiner does not see a distinction between this phrase and the fact the ammonium chloride condenses on the conduit in the prior art of Hey. The condensing and clogging of the conduits in the prior art is a separation process in the broadest interpretation of the claimed language. The cleaning of said conduits using heat if not inherent in Hey is an obvious choice. Thus the examiner is maintaining his position for the reasons of record which clearly point out that the claimed invention is inherent in the process of Hey. If Hey does not clearly heat the conduits, then the claimed invention is obvious in view of fact that the conduits require cleaning and unclogging. Hey already disclosed that ammonium chloride decomposes over a certain temperature. Thus it would have been obvious to heat the conduits in Hey in order to clean them.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1621

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-17, 19, 21 and 23-24 rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hey et al.

For reasons see above arguments and previous 102 and 102 rejections of record.
